

Thank you for purchasing South Beach Bubbles products. We hope you enjoy blowing giant bubbles as much as we do! Our company strives to make happy hour a bubbly festival for the whole family.

We would be ecstatic if you "Like" South Beach Bubbles page on Facebook
www.facebook.com/SouthBeachBubbles

3 Simple Steps

1

Add the entire content of the WOWmazing™ Giant Bubble Concentrate pouch to one quart (32 oz or 4 cups) of tap water. Mix it gently to avoid creating excess foam.

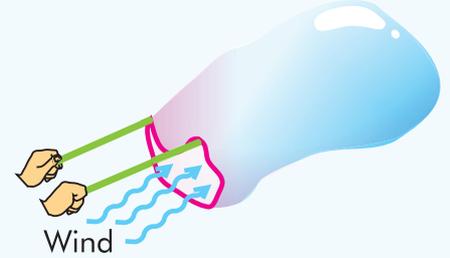

2

Dip the string fully into the WOWmazing™ Giant Bubble Solution.

3

With the breeze at your back, keep the tips together and lift high into the air. Slowly spread the two tips apart and the breeze will begin to blow the big bubble outward.

The South Beach Bubbles team

South Beach Bubbles mission is to get kids and adults to play outdoors and bring family and friends together while enhancing the imagination and coordination, decreasing stress, and enjoying carefree childhood fun! Next time you go bubbling, take some photos of your friends and family playing with our products and post them on our page on Facebook and you will be entered to win monthly prizes!
 We appreciate your business, and hope you and your family have a great time together blowing giant bubbles!
 Sincerely,

WOWmazing[®] Two-at-time

Wrap your WOWmazing[®] cord around each other to make it double the fun! Two bubbles simultaneously means more bubbles faster for everyone to enjoy!

WOWmazing[®] Spiral Loops

One or Two handed spiral around to make a full looped bubble!

WOWmazing[®] Touch-a-bubble

Dip your clean hands directly into the WOWmazing[®] Giant Bubble Solution and gently touch a floating bubble. Note: trick will not work if your hands are oily or greasy.

WOWmazing[®] Flippers

Flip your WOWmazing[®] with a back and forth motion to make a non-stop repetition of gigantic bubbles.

Additional Tips

- If you keep the tips in the open position, you can make a long bubble tube, until it pops. Or bring the tips back together to make a large big bubble.
- If there is no breeze, move the sticks to the open position and move them through the air or slowly spin around in a circle. Make all your movements slowly, just fast enough to form the bubble, but not too fast, or it may pop.
- As the soap film breaks, dip the loop gently into the solution again.
- If the breeze is strong, open the loop an inch or two and this will create a cluster of small bubbles.

Additional tricks and instructional videos available on our website at www.southbeachbubbles.com

WOWmazing[®] Bubbles-in-a-bubble

Make one gigantic bubble using the WOWmazing[®] wands, then slowly blow air towards the larger bubble to create smaller bubbles.

WOWmazing[®] Catch-a-bubble

Make a smaller bubble keeping the tips of the WOWmazing[®] wands closer together and then cover up that bubble with a bigger bubble by expanding your WOWmazing[®] around that smaller bubble.

Bubble Troubles??

The majority of bubble troubles are typically caused by water impurities. We suggest trying an alternative water source such as distilled or bottled water to help create the ideal solution.

Still having troubles? Contact us at CustomerService@SouthBeachBubbles.com or 954-418-2980 and we will gladly take all your bubble troubles away!
